Relevant Experience

UX/UI Developer @TopCashback

August 2019 - Present // Stafford, UK

- Design and develop well performing, accessible and responsive features on the TopCashback platform.

- Work in an ASP.Net environment, using web forms, html, sass and javascript. Create and manage css/js bundles to optimise performance.

- Develop an Adobe XD asset library for the design team as well as reusable components/classes for the developers. Create and maintain documentation for the design system.

- Collaborate with different back-end teams and develop a working process. Point of contact for back-end developers regarding any front-end questions/issues

- Work with various UX/Optimisation tools to test different variations of features for engagement/click-through/conversions (convert, crazyegg)

- Test new pages, features and code for cross-compatibility (Browserstack) and performance/accessibility (Lighthouse/DevTools).

Web Designer @TopCashback

August 2017 - September 2018 // Stafford, UK

- Design creatives for different merchants on the TopCashback platform, including new member acquisition, marketing and E&R campaigns.

- Communicate with stake holders and collaborate with other teams (including international clients) to create polished creatives. One of the projects was short-listed for an award.

- Design and develop a WordPress solution for the TopCashback careers site. Maintain and support the project for further developments/features.

- Design logos and creatives ready for print, liaise with other departments in the company for bespoke design projects.

Education

Digital Media BSc @University of Portsmouth
